

Meowdy, marvelous makers of machine magic!

 **PurrfectKit.** Whether you're chunking, searching, embedding, extracting, or orchestrating, I've got a cat for that.  Let me introduce you to my *claw-some crew* from the purrfectmeow family:

Kornja – The Text Tamer

Breaks your big, beautiful documents into tidy, manageable chunks. Purr-fect for RAG-ready input!

WichienMaat – The Semantic Sleuth

Understands query intent like a mind-reading mouser. Finds the most relevant info without breaking a sweat (or a whisker).

KhaoManee – The Vector Virtuoso

Turns words into smart embeddings and stores them for lightning-fast retrieval. Elegant *and* efficient—just like her gem-like eyes.

Malet – The Extraction Expert

Reads from PDFs, images, spreadsheets, and Markdown. If it's got text, Malet will find it—no scratching required.

Suphalaks – The Backbone Builder

Handles file operations, loads models, and keeps everything running smoothly behind the scenes. The true silent guardian of the kitty-verse.

So what are you waiting for? Unleash the purr-fect power of your data with us! covered.

Stay sharp. Stay curious. Stay purring.

— *With whiskers and wonder, your loyal library,*
